This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area. Fall soil drench treatment of 3-5 year old citrus trees may pose risks to honey bees that forage in the trees during the winter/spring bloom. Applicators are advised to help mitigate such risks by cooperating with the Florida Department of Agriculture and Consumer Services in its efforts to communicate hive location/placement options with local beekeepers.
